

# Rotary Dampers

## Small dampers refine end product

**ACE rotary dampers mainly provide an invisible yet valuable service as a maintenance-free machine element to allow controlled deceleration of rotary or linear movements.**

They are often necessary to make careful opening and closing of small lids, compartments and drawers possible and they protect sensitive components while increasing the quality and value of products. They are easy to integrate. The harmoniously gentle movements of these little decelerators can be achieved with continual rotation or with limited pivoting angles. They slow down left, right or double sided rotation. Suitable for almost any application and currently also available in adjustable variations, they provide braking torques of 0.05 Ncm to 40 Nm.

**Partial Rotation Angle, Adjustable**  
e.g. FYT-H1 and FYN-H1

### General Function

Rotary dampers operate on the principle of fluid damping. The damping moment is determined by the viscosity of the fluid and the dimensioning of the throttle gap or throttle orifices.

### Rotary Dampers with Continuous Rotation

Rotate for the plus in quality: For smooth, quiet movements of small hoods, flaps and fans these continuously rotating rotary dampers from ACE decelerate either right, left or two-sided rotation right in the pivot point or linear through a gear and gear rack. The harmoniously gentle process protects components and increases the quality and value of products. The maintenance-free, ready-to-install ACE rotary dampers are filled with an inert fluid, usually silicone oil. The viscosity of the fluid and the sizing of the throttling gap determine the damping torque. The FFD series is the only exception: These fluid-free rotary dampers operate according to the principle of friction.

The continuously rotating rotary dampers with the designations FRT, FRN, FFD, FDT and FDN are used in household and medical devices as well as in the automotive, electronics and furniture industries.

### Rotary Dampers with Partial Rotation Angle

For controlled and gentle deceleration: The damping direction of this rotary damper, which is available with adjustable damping torque, can be right, left or two-sided rotation. They can be installed directly in the pivot point of a construction and achieve uniform, quiet movements, which increases quality and value and protects sensitive components. The products are maintenance-free, ready-to-install and filled with an inert fluid, usually silicone oil. A rotor movement presses the fluid from one chamber into the other. The damping torque is determined by the viscosity of the fluid and the sizing of the throttling gap the throttle holes. During each reversal of movement, depending on the frame size a certain return damping torque develops.

These solutions are used in the automotive sector, in many industrial applications, in the electronics and furniture industries as well as in medical devices.

## FRT-E2 Rotary Dampers

### Small and lightweight for finest braking

The damping direction of the smallest ACE FRT-E2 rotary dampers with plastic body is rotating on both sides. They can brake directly in the pivot point or linear through a gear and gear rack. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 10 mm

**Rotational speed max.:** 50 rpm

**Lifetime:** 50,000 cycles (1 cycle = 360° left-hand, 360° right-hand). Even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** 0 °C to +50 °C

**Pressure angle:** 20°

**Material:** Outer body, Shaft, Gear: Plastic

**Mounting:** In any position

**Tooth:** Involute gearing

**P.C.D.:** 6 mm

**No. of teeth:** 10

**Module:** 0.6

**Mounting information:** No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request. Toothed plastic racks (modules 0.5 to 1.0) are available for the rotary dampers with pinions.

### Characteristics

#### At 23 °C ambient temperature

#### At 20 rpm rotational speed

### Performance

TYPES	<sup>1</sup> Damping torque Ncm	Damping direction	Gear	Weight kg

<sup>1</sup> The indicated damping torque refers to a rotational speed of 20 rpm and an ambient temperature of 23 °C.

## FRT-G2 Rotary Dampers

### Small and lightweight for finest braking

The damping direction of the ACE FRT-G2 product family with plastic body is rotating on both sides. The small rotary dampers can brake directly in the pivot point or linear through a gear and gear rack. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 15 mm

**Rotational speed max.:** 50 rpm

**Lifetime:** 50,000 cycles (1 cycle = 360° left-hand, 360° right-hand). Even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** 0 °C to +50 °C

**Pressure angle:** 20°

**Material:** Outer body, Shaft, Gear: Plastic

## FRT-C2 and FRN-C2 Rotary Dampers

### Flexible and cost efficient use

The damping direction of the simple FRT-C2 and FRN-C2 is either right, left or two-sided rotation. These ACE rotary dampers with plastic body can decelerate directly in the pivot point or linear through a gear and gear rack. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 15 mm

**Rotational speed max.:** 50 rpm

**Lifetime:** 50,000 cycles (1 cycle = 360° left-hand, 360° right-hand). Even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

<sup>1</sup> The indicated damping torque refers to a rotational speed of 20 rpm and an ambient temperature of 23 °C.

## FRT-D2 and FRN-D2 Rotary Dampers

### Flexible and cost efficient use

The damping direction of the ACE FRT-D2 and FRN-D2 rotary dampers with plastic body is either the right, left or two-sided rotation. They can decelerate directly in the pivot point or linear through a gear and gear rack. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 25 mm

**Rotational speed max.:** 50 rpm

**Lifetime:** 50,000 cycles (1 cycle = 360° left-hand, 360° right-hand). Even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** 0 °C to +50 °C

**Pressure angle:** 20°

**Material:** Outer body, Gear: Plastic; Shaft: Plastic, steel

**Mounting:** In any position

**Tooth:** Involute gearing (addendum modification coefficient: +0.375)

**P.C.D.:** 12 mm

**No. of teeth:** 12

**Module:** 1

**Mounting information:** No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request. Toothed plastic racks (modules 0.5 to 1.0) are available for the rotary dampers with pinions.

Continuous Rotation

# FRT-F2/K2 and FRN-F2/K2 Rotary Dampers

## For very long service life extension

The damping direction of FRT F2/K2 and FRN-F2/K2 is either the right, left or two-sided rotation. With a damping torque of up to 400 Ncm, this product family can even handle heavy components. These ACE rotary dampers can decelerate directly in the pivot point or linear through a gear and gear rack. They are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 40 mm

**Rotational speed max.:** 50 rpm

**Lifetime:** 50,000 cycles (1 cycle = 360° left-hand, 360° right-hand). Even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** 0 °C to +50 °C

**Material:** Outer body: Plastic; Shaft: Steel

**Mounting:** In any position

**Mounting information:** No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

### Characteristics

FRN-F2-L203	200 +/- 40	left	0.090

<sup>1</sup> The indicated damping torque refers to a rotational speed of 20 rpm and an ambient temperature of 23 °C.

### FFD Rotary Dampers

#### Precise braking without oil

In comparison to other rotary dampers, the ACE FFD product family does not need any fluid to generate the damping torque, but rather works on the principle of friction. That means temperature or speed changes have virtually no influence on the damping torque. The FFD is available in two different body variants and two types of bearings. ACE rotary dampers are maintenance-free and ready-to-install.

#### Technical Data

**Construction size:** Ø 25 to 30 mm

**Rotational speed max.:** 30 rpm

**Lifetime:** 30,000 cycles (1 cycle = 360° left-hand, 360° right-hand). Even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -10 °C to +60 °C

**Material:** Outer body: Plastic

**Mounting:** In any position

**Information to the shaft:** Ø +0 / -0.03

Hardness > HRC55, surface smoothness RZ<1µm

**Mounting information:** Turn the shaft in the opposite direction to the brake direction to avoid damaging the freewheel mount. No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

#### Ordering Example

**FFD-25-FS-L-102**

Friction Damper \_\_\_\_\_  
 Body Ø \_\_\_\_\_  
 Mounting Style (flange = F, standard = S) \_\_\_\_\_  
 Model (standard = S, high = W) \_\_\_\_\_  
 Damping Direction (right = R, left = L) \_\_\_\_\_  
 Damping Torque see chart \_\_\_\_\_

#### Complete details required when ordering

- Damping torque 102 = 0.1 Nm
- Damping torque 502 = 0.5 Nm
- Damping torque 103 = 1.0 Nm
- Damping torque 153 = 1.5 Nm
- Damping torque 203 = 2.0 Nm
- Damping torque 253 = 2.5 Nm
- Damping torque 303 = 3.0 Nm
- Note dimension C.

#### Model Type Prefix

- FS = Mounting Style with Flange, Model standard
- FW = Mounting Style with Flange, Model high
- SS = Mounting Style Standard, Model standard
- SW = Mounting Style Standard, Model high
- Combinations with W for higher damping torque.

<sup>1</sup> The indicated damping torque refers to a rotational speed of 20 rpm and an ambient temperature of 23 °C.

# FDT Rotary Dampers

## The flat disc brake for two-sided damping

The damping direction of the flat constructive ACE rotary damper FDT with robust steel body is two-sided rotation. It can brake directly in the pivot point of the square receptacle. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 47 to 70 mm

**Rotational speed max.:** 50 rpm

**Lifetime:** 50,000 cycles (1 cycle = 360° left-hand, 360° right-hand). Even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -10 °C to +50 °C

**Material:** Outer body: Steel; Output shaft sleeve: Nylon

**Mounting:** In any position

**Mounting information:** No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

### Characteristics

#### At 23 °C ambient temperature

#### At 20 rpm rotational speed

### Performance and Dimensions

TYPES	<sup>1</sup> Damping torque Nm	Damping direction	A mm	B mm	C mm	D mm	E mm	F mm	G mm	H mm	R mm	J mm	Weight kg

<sup>1</sup> The indicated damping torque refers to a rotational speed of 20 rpm and an ambient temperature of 23 °C.

### FDN Rotary Dampers

#### The flat disc brake for one direction of rotation

The damping direction of the flat, strong FDN rotary dampers with steel body can be either right or left rotation. They can brake directly in the pivot point. ACE rotary dampers are maintenance-free and ready-to-install.

#### Technical Data

**Construction size:** Ø 47 to 70 mm

**Rotational speed max.:** 50 rpm

**Lifetime:** 50,000 cycles (1 cycle = 360° left-hand, 360° right-hand). Even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -10 °C to +50 °C

**Material:** Outer body: Steel

**Mounting:** In any position

**Information to the shaft:**

FDN-47: Ø 6 +0 / -0.03

FDN-57 to FDN-70: Ø 10 +0 / -0.03

Hardness > HRC55, surface smoothness  $R_z < 1 \mu\text{m}$

**Mounting information:** Turn the shaft in the opposite direction to the brake direction to avoid damaging the freewheel mount. No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

<sup>1</sup> The indicated damping torque refers to a rotational speed of 20 rpm and an ambient temperature of 23 °C.

Partial Rotation Angle

# FYN-P1

## Rotary Dampers

### Small diameter, large damping torques

The damping direction of the rotary damper FYN-P1 can be either right or left rotation. The dampers can be directly mounted in the pivot point. During each reverse movement of the unilateral decelerating versions there is a certain return damping torque that depends on the size. Differentiation of the damping direction through the coloured shaft. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 18.5 mm

**Lifetime:** 50,000 cycles, even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -5 °C to +50 °C

**Material:** Outer body, Shaft: Plastic

**Mounting:** In any position

**Rotation angle max.:** 115°

**Note:** Damping direction: Right hand damping = damping action in clockwise direction (when looking onto the output shaft or output shaft sleeve, depending on the damper type). A play of approx. 5° can occur at the beginning of movement.

**Mounting information:** No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

## FYN-N1 Rotary Dampers

### Small diameter, large damping torques

The damping direction of the rotary damper FYN-N1 can be either right or left rotation. The dampers can be directly mounted in the pivot point. During each reverse movement of the unilateral decelerating versions there is a certain return damping torque that depends on the size. Differentiation of the damping direction through coloured end cap. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 20 mm

**Lifetime:** 50,000 cycles, even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -5 °C to +50 °C

**Material:** Outer body, Shaft: Plastic

**Mounting:** In any position

**Rotation angle max.:** 110°

**Note:** Damping direction: Right hand damping = damping action in clockwise direction (when looking onto the output shaft or output shaft sleeve, depending on the damper type). A play of approx. 5° can occur at the beginning of movement.

**Mounting information:** No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

## Partial Rotation Angle

## FYN-U1

### Rotary Dampers

#### Small, strong and very robust

The damping direction of the rotary damper FYN-U1 can be either right or left rotation. The dampers can be directly mounted in the pivot point. The body is made of especially robust die-cast zinc. During each reverse movement of the unilateral decelerating versions there is a certain return damping torque that depends on the size. ACE rotary dampers are maintenance-free and ready-to-install.

#### Technical Data

**Construction size:** Ø 16 mm

**Lifetime:** 50,000 cycles, even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -5 °C to +50 °C

**Material:** Outer body, Shaft: Zinc die-cast

**Mounting:** In any position

**Rotation angle max.:** 115°

**Note:** Damping direction: Right hand damping = damping action in clockwise direction (when looking onto the output shaft or output shaft sleeve, depending on the damper type). A play of approx. 5° can occur at the beginning of movement.

**Mounting information:** No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

### FYN-S1 Rotary Dampers

#### The flat damper for constant component protection

The self-compensating FYN-S1 rotary damper with zinc die-cast body provides a constant sequence of movement for different masses. The damping direction can be either right or left rotation. During each reverse movement of the unilateral decelerating versions there is a certain return damping torque that depends on the size. ACE rotary dampers are maintenance-free and ready-to-install.

#### Technical Data

**Construction size:** Ø 60 mm

**Lifetime:** 50,000 cycles, even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -5 °C to +50 °C

**Material:** Outer body: Zinc die-cast; Output shaft sleeve: Plastic

**Mounting:** In any position

**Rotation angle max.:** 130°

**Note:** Damping direction: Right hand damping = damping action in clockwise direction (when looking onto the output shaft or output shaft sleeve, depending on the damper type). A play of approx. 5° can occur at the beginning of movement.

**Mounting information:** No axial or radial forces may be induced via the shaft.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

FYN-S1-L104	5 - 10	1.5	left	0.220

# FYT-H1 and FYN-H1 Rotary Dampers

## Specifically adjustable, strong braking force

The damping direction of the adjustable FYT-H1 and FYT-H1 can be right, left or two-sided rotation. During each reverse movement of the unilateral decelerating versions there is a certain return damping torque that depends on the size. The brakes have a particularly robust zinc die-cast body and shafts made of steel. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 45 mm

**Lifetime:** 50,000 cycles, even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -5 °C to +50 °C

**Material:** Outer body: Zinc die-cast; Shaft: Steel

**Mounting:** In any position

**Rotation angle max.:** 105°

**Maximum side load:** 50 N

**Note:** Damping direction: Right hand damping = damping action in clockwise direction (when looking onto the output shaft or output shaft sleeve, depending on the damper type). A play of approx. 5° can occur at the beginning of movement.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

## FYT-LA3 and FYN-LA3 Rotary Dampers

### Adjustable high performance

The damping direction of this adjustable high-performance rotary damper can be right, left or two-sided rotation. During each reverse movement of the unilateral decelerating versions there is a certain return damping torque that depends on the size. The brakes have a particularly robust zinc die-cast body and shafts made of steel. ACE rotary dampers are maintenance-free and ready-to-install.

### Technical Data

**Construction size:** Ø 80 mm

**Lifetime:** 50,000 cycles, even after this time, the dampers still produce over approx. 80 % of their original damping moment. The service life may be significantly higher or lower, depending on the application.

**Operating temperature range:** -5 °C to +50 °C

**Material:** Outer body: Zinc die-cast; Shaft: Steel

**Mounting:** In any position

**Rotation angle max.:** 210°

**Maximum side load:** 200 N

**Note:** Damping direction: Right hand damping = damping action in clockwise direction (when looking onto the output shaft or output shaft sleeve, depending on the damper type). A play of approx. 5° can occur at the beginning of movement.

**Safety instructions:** Do not use rotary dampers as supports. Provide an external guide or support.

**On request:** Special designs available on request.

### Performance

TYPES	Damping torque Nm	Return Damping Torque Nm	Damping direction	Weight kg
FYT-LA3	4 - 40	4	bidirectional	1.720
FYN-LA3-R	4 - 10	4	right	1.725
FYN-LA3-L	4 - 10	4	left	1.725

### Calculation Example

#### Damping of a Lid

To select an appropriate rotary damper for the adjacent calculation example, the length and the weight or the centre of gravity of the flap have to be known. After determining the value of the max. torque at an unfavourable angle of the flap, select the appropriate damper.

#### Calculation Steps

1. Calculate max. torque damper will be exposed to (with example shown on the left max. torque is at  $\alpha = 0^\circ$ ).
2. Decide upon rotation speed desired.
3. Choose a rotary damper that can handle the torque calculated above.
4. With the aid of the damper performance curves, check if the r.p.m. given at your torque corresponds to the desired closing speed of the lid.
5. If the r.p.m. is too high – choose a damper with a higher torque rating.  
If the r.p.m. is too low – choose a damper with a lower torque rating.

Closing Torque  
 $M = L / 2 \cdot m \cdot \cos \alpha$   
 (L / 2 = centre of gravity)

m Mass of a lid [kg] (1 kg = 9.81 N)  
 L Length of lid from pivot [cm]  
 n Rotation speed [r.p.m.]

### Special Accessories

#### Toothed Racks for Rotary Dampers with Gear

Rotary dampers with gears are available in four standard modules which can be optionally supplied with plastic toothed racks as accessories.

**M0.5, M0.6, M0.8, M1.0**  
Toothed Rack

**M0.8P**  
Toothed Rack

#### Delivery Notes

**Delivery form:** Toothed plastic racks with modules 0.5 to 1.0 available ex stock

**On request:** Toothed metal racks

#### Dimensions

Type	A mm	B mm	C mm	Model
M0.5	250	4	4.5	rigid, milled
M0.6	250	4	6	rigid, milled
M0.8	250	6	8	rigid, milled
M0.8P	170	8	4.1	flexible, milled
M1.0	250	9	9	rigid, milled
M1.0	500	10	10	rigid, milled

#### Mounting Information

The rotary axis, square receptacles or free-wheel receptacles are not designed for lateral loads. An external guide or bearing support is fundamentally recommended.

### Application Examples

#### FDT Finger protection when cutting bread

To exclude the possibility of injury when using bread slicing machines on self-service counters, the automatic bread slicing process does not start until the flap of the modern machine is closed. To simplify the operation and to thereby increase acceptance of the self-slicing principle among users, two-way rotary dampers of the type FDT-57 ensure smooth opening and closing of the door. Even when rotary dampers must act only in one direction, ACE has appropriate variants readily available.

Protective flaps secured with rotary dampers: the simple operation of bread slicing machines can then be easily managed by hand  
Daub Bakery Machinery BV, 5050 AB Goirle, Netherlands

#### FDN-R Invisible protection for cooker hoods

For ergonomic handling, modern cooker hoods can be driven by a motor into an up position and then down again. When driven downwards, an AC load can result in a total loss through current being fed back into the voltage source. One of the tasks of the ACE rotary dampers type FDN-63-R is to prevent this. The modern machine elements are also built to provide protection against motor failure. Sliding the hood down too quickly could lead to further costly damage to the hood and the ceiling console and even cause personal injury.

Rotary dampers in high-end cooker hoods safeguard the protection of drive units and protect chefs, even during power failures
